

# Database, user interface, and website all in one

A single platform to store digital resources, manage information, and publish collections online.

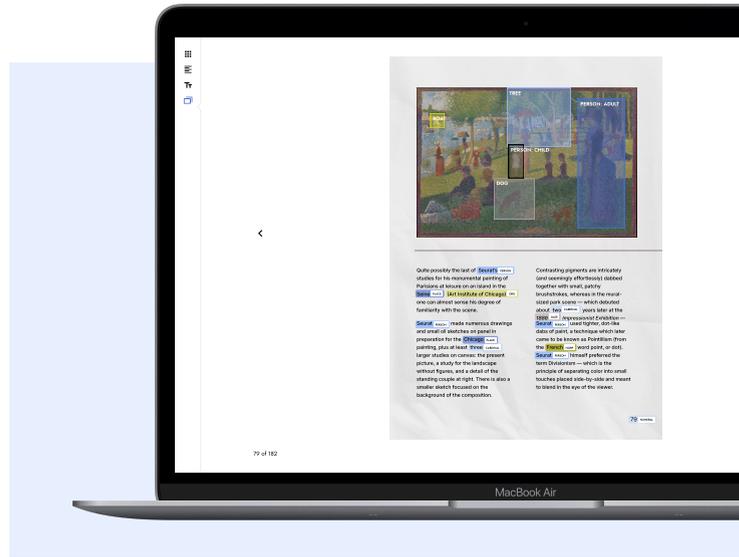

## Do more — faster

Spend less time switching between digital tools and rewriting the same information. The Navigating.art online interface allows users to access collection and operational information from the same window.

## Engage more visitors online

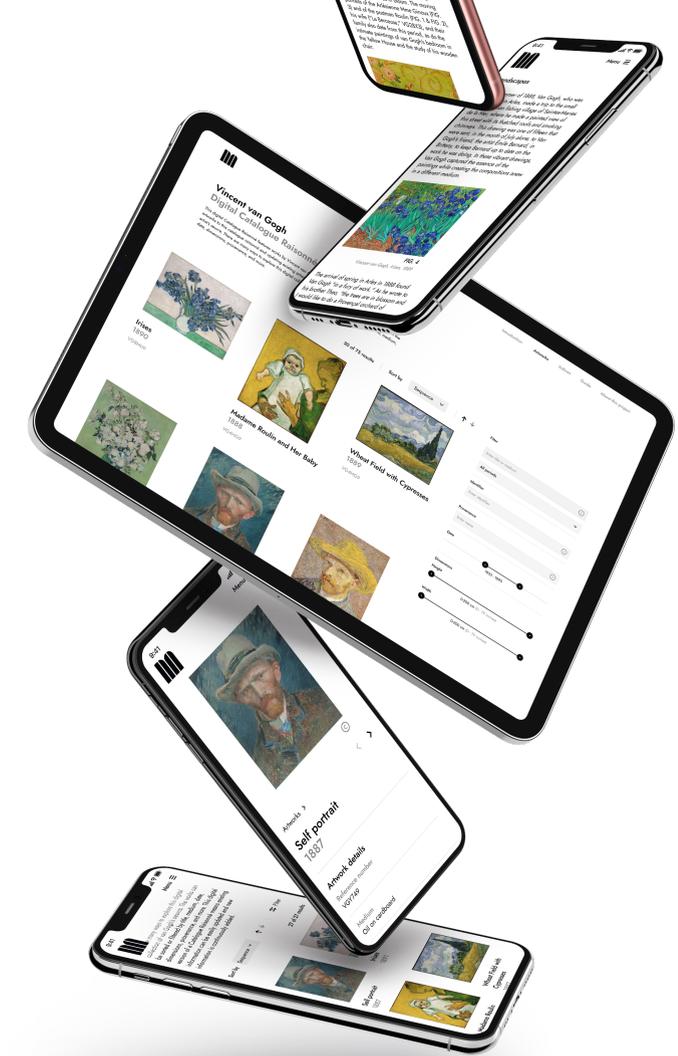

Choose what internal information to publish at a granular level and click publish when you're ready to share it with the world. No IT required.

## Get more from digitized sources

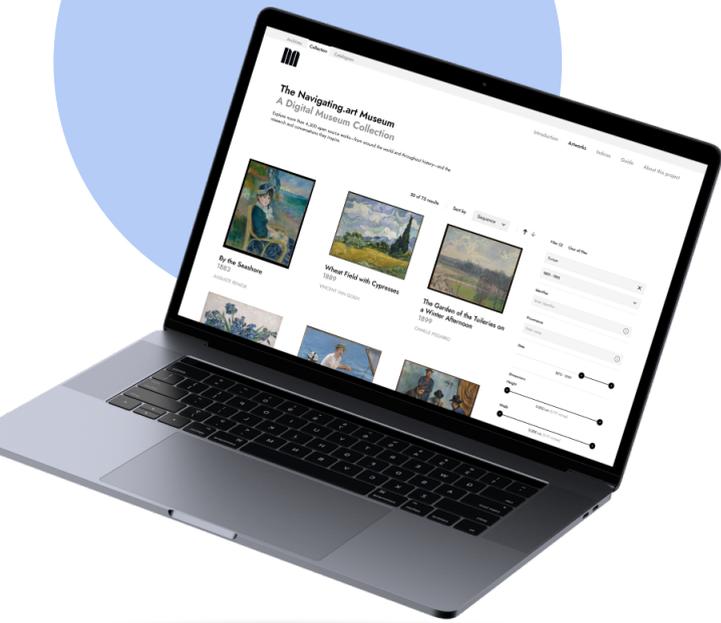

The platform identifies entities in handwritten and typed text, such as the name of a painter or city, which users can search for in their preferred languages. Images uploaded to the Navigating.art platform are scanned for identifiable components, such as boats, trees, and people. All identifications are displayed with descriptive visual labels.

“Before Navigating.art, I didn't know a digital catalogue raisonné could be such a breath-taking piece of scholarship; a brilliant piece of work. Sophisticated yet so easy to use!

ONE PLATFORM TO  
BRING YOUR COLLECTION  
TO A GLOBAL AUDIENCE

### Digital catalogues raisonnés

## Create and publish digital catalogues raisonnés

Navigating.art's platform makes creating, structuring, and publishing a digital catalogue raisonné an efficient process.

### Collaborate seamlessly

The Navigating.art platform lets multiple contributors work simultaneously. User roles and permissions ensure everyone works within their areas of expertise within the database, the single source of truth.

### Expedite the editing process

The Navigating.art platform uses dynamic references, autogenerated text fields, and structured content so that spelling errors and typos can't slow you down.

### Reach readers across the globe

Expanding access to an artist's oeuvre has never been easier with Navigating.art's publishing feature. Decide what to publish on a granular level and share with the world in one click.

### Collection management

## Collaborate effectively while securely managing and publishing your collection online

The only platform needed to manage all aspects of museum archives and collections — from provenance to loan procedures to online engagement strategies.

### Reduce costs with predictable pricing and no IT

No need to pay developers to set up or customize a management solution with Navigating.art.

### Protect information by using one platform

Capture, manage, and publish collections from one platform to guard against losing information to silos and unstructured storage.

### Work efficiently with standardized data

Rapidly complete daily tasks with standardized data to spend more time on creative projects that engage visitors.
